With Kanban, the team will stop starting and start finishing, maintaining a flow state of a sustainable working cycle.

Get ICAgile Certified

ICAgile helps professionals transform themselves into agile masters who can blend agile methodologies and push beyond the limitations of agile processes. We do this by making sure the agile courses you take are accredited against proven, discipline-specific learning outcomes. As an accreditation body – supported by agile thought leaders – we work with training providers and organizations to accredit their agile workshops and ensure all learning takes you on a journey to agile mastery.

ICAgile Agile Fundamentals (ICP)

This agile certification is a gateway to ICAgile's product and technical certifications. It is intended for product development and delivery practitioners who are new to agility and interested in developing an agile mindset. Other professions besides software development will also benefit with this certificate, e.g. Human Resource.
